EDUCATION

RV College of Engineering, Bengaluru 2023 – 2027 (Expected)
Bachelor of Engineering in Computer Science and Engineering (CGPA: 8.20 / 10)

EXPERIENCE

GenAI Product Developer Intern | HiDevs 2025

- Architected an AI-powered event discovery platform by scraping, structuring, and semantically indexing multi-source event data for intelligent retrieval.
- Built a reusable AI WhatsApp agent platform using FastAPI, Meta Cloud API, LangChain/Groq, and MongoDB, with RAG using MiniLM embeddings + ChromaDB for domain-specific knowledge retrieval.
- Shipped 3 LLM-assisted product workflows — event discovery, content generation, and user engagement — integrating frontend/backend APIs into user-facing product features.

PROJECTS

TeamSync | FastAPI, SQLAlchemy, SQLite, MongoDB, Qdrant 2026

- Built a full-stack academic project-management platform with a FastAPI backend for student teams, projects, mentor allocation, and phase-wise evaluation.
- Designed a relational data layer using SQLAlchemy ORM on SQLite, with schema migration and data-seeding scripts, alongside MongoDB for document data.
- Implemented semantic project search using Qdrant vector embeddings, exposed through modular REST API routers with student and faculty registration.

JurisCode | Qwen2.5, PEFT LoRA, FastAPI 2026

- Fine-tuned three PEFT LoRA adapters on Qwen2.5-3B-Instruct for premise generation, opposing-counsel simulation, and objection evaluation.
- Designed a shared model-serving architecture with runtime adapter switching and structured outputs, serving multiple legal-simulation tasks from one inference pipeline.
- Benchmarked standard and 4-bit quantized inference modes behind a FastAPI service for session-based interaction and feedback.

PitchFight AI | React, FastAPI, PostgreSQL, MongoDB, Redis, vLLM 2026

- Engineered a multi-persona AI pitch simulation platform with VC, technical, and hackathon judges, supporting adaptive multi-round questioning, negotiation, and rubric-based structured scorecards.
- Rebuilt the backend as a modular FastAPI architecture, separating persistent relational data in PostgreSQL, conversation history in MongoDB, and active session state/cache in Redis.
- Designed a model-agnostic AI orchestration layer using prompt builders, model routing, and self-hosted LLM inference through vLLM, separating deterministic simulation logic from LLM-generated reasoning and responses.

TECHNICAL SKILLS

Programming Languages: C++, C, Python, JavaScript
Backend & Frameworks: FastAPI, SQLAlchemy, Node.js, React.js, REST APIs
Databases: MySQL, PostgreSQL, MongoDB, SQLite, Qdrant
Developer Tools: Git, Github
Core Computer Science: Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS, Object-Oriented Programming

ACHIEVEMENTS

- Winner — Hugging Face Community Prize, Build Small Hackathon | 2026
- Winner — AIML Track, NMIT Hacks | 2025

CERTIFICATIONS

NPTEL — Data Science for Engineers, IIT Madras 2025
NPTEL — AI for Economics, IIT Kharagpur 2025

ADDITIONAL INFORMATION

Leadership: Secretary, Accelerate Club — RV College of Engineering
Languages Known: English, Hindi
